Manufactured to ISO9001 quality standards

Take the 360 tour press the play button

Design Features

- Interlocking lid with tamper proof seal holes locking into both base and lid.
- Lid designed to interlock additional totes when stacked, lowering movement risk in transit
- Traditional Kaiman design, giving additional locking when nested together when empty.
- Additional indentations can be added, to create an easy peel surface to remove transit labels.

Additional Options

- Available in 3 material options virgin plastic, 70:30 virgin : recycled plastic (other % options are available on request) and Repro -100% recycled plastic.
- Available in a variety of colours both base and lid(please be aware colours restrictions are linked to material type)
- Laminated digital printing, for either logos, images or writing . Maximum print size (85mm Height x 250mm width)
- Security tamper proof seals available, again available in any colour or quantity.
- Labels and barcodes can be added either being provided by us or the customer.
- Option to reprocess your old plastic boxes, giving you a price per kilo (please contact for availability) We are not responsible for collection or delivery for this service.
